CAPABILITY STATEMENT

## ABOUT US

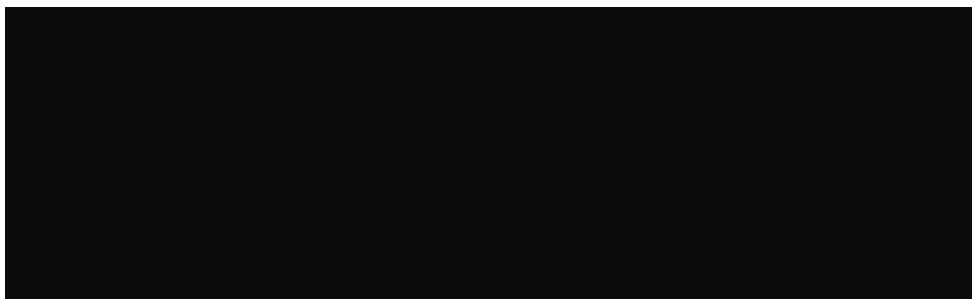

Victor Security is one of Australia's leading Managed Security Services company that has been making sure clients and businesses all over the country feel secure and protected when it comes to asset protection and minimising risk. When working with Victor Security, living up to your expectations and trust is placed at the highest level.

Victor Security has a team of immensely capable and professional individuals that have been providing our services to clients with the best of the abilities. We take immense care and follow due process to ensure that each member on our team goes through a thorough background check.

Our mission is to make sure businesses and individuals across Australia don't have to worry about uncertainties and risks that prevail around the world. Victor Security makes sure your future is protected by providing services that go above and beyond to mitigating any risks or blind spots that can arise while running a business.

In an ideal world everyone would feel safe while going shopping, transporting valuables from one place to another, or not have fears about any potential threats, but that is not the world we live in. however, it doesn't mean you can't take steps to protect your workplace, employees, and assets from any risks or unforeseen threats.

Victor Security provides you with Security services that will prevent any false alarms or potential risks in the present, for a safer, protected future.

Victor Security provides a whole range of managed security services for business small and big all over Australia. Irrespective of your industry, the solutions and services at Victor Security can be implemented to ensure your employees and customers feel safe and secure while conducting business.

Here is a quick rundown of all the services we provide.

### **SUPPLY GUARDS**

Security Guards recruited by Victor Security undergo a tedious selection process which includes police clearance, probity, numeracy and literacy tests, along with undergoing training for core competencies. All our guards ensure they embody a professional attitude and are prepared to meet with any situation and provide an adequate response.

Our guards are trained to ensure they can take control of any escalated situation, identify potential threats, vandalism, any safety risks and provide clients with services that fit their requests as well.

### **RETAIL (VENUES / EVENTS)**

Victor Security has a team of capable individuals that have been trained with skills and core competencies that equip them to handle and manage any large venues or events happening in doors or outside.

From providing venue security, controlling a large crowd, personnel that are equipped to interact professionally and nicely with guests, or close protection for VIP or VVIP guests, Victor Security can manage it all.

### ASSET PROTECTION

Asset protection is vital for businesses that require securing their financial, data, device, or other components of their organisations. Victor Security understands the complexities that are involved in managing and protecting assets in a volatile and uncertain world.

We design and customise our solutions taking in view the industry our clients work in that allows Victor Security to better manage expectations and mitigate potential risks.

### PRIORITY SERVICES

Victor Security is equipped to provide 24/7 priority security services for retail shops, data sensitive facilities, corporations, and venues. Not only do we have the capabilities to provide personnel on ground, but technological solutions as well that observe and alert regarding any unforeseen activity or potential threats.

Trust Victor Security to plan ahead in time for a better, safe, and protected future for your business and customers.

SECURITY SERVICES

# SAFETY

We live in an extremely volatile, uncertain, and unpredictable world. Running a business in an environment where you can't predict how markets will react the next minute or how a global event can stop the world as we know it, makes business owners and companies stop in the steps and evaluate how they can tackle such conditions.

As a managed security services company, Victor Security aims at providing clients with a sense of ease and assurance that their employees and assets are in good hands. We work with clients to provide them customised, actionable plans that will ensure that no matter which sector or industry they run a business in, their employees are always protected.

We offer safety management programs that includes training, testing procedures, and equipment that will enable our clients to make sure their employees and the community they operate out of are protected.

For Victor Security, no business goal or technical objective is more important than the health or safety of our employees which places us at a reliable position to deliver the same principles and values to our clients while providing them a safety protocol strategy.

# OUR CLIENTS ARE IMPORTANT TO US

Victor Security isn't just a security services provider that makes sure our clients are fully protected against potential risks, threats or unforeseen events. We are a company that builds relationships with clients on the basis of trust, professionalism and to enable each other to grow for more success.

Being a managed security services provider has allowed Victor Security to gain the foresight and experience to handle escalated situations and circumstances where the potential for anything to go wrong is high. Our

experience has allowed us to have a keen insight into what measures and steps we need to take in order to ensure our clients and their interests are always protected.

Whether our clients need security personnel for themselves, their premises or events, we hire individuals that go through heavy screening and background checks. Similarly, asset protection, providing 24/7 priority service and safety management for employees are all the many services we provide.
